	Sommario/riassunto	Welcome to MSR 2019, the Sixteenth International Conference on Mining Software Repositories, held on May 26 and 27 in Montreal, Canada, co-located with the 41st International Conference on Software Engineering (ICSE 2019). In 2004, the first International Workshop on Mining Software Repositories was held in Edinburgh, Scotland. It was a resounding success. In the past 15 years, MSR has grown into a thriving community that organizes a yearly conference that has gained a solid reputation amongst software engineering researchers.

Sommario/riassunto	This highly accessible, engagingly written book exposes the underbelly of California's Silicon Valley, the most successful high-technology region in the world, in a vivid ethnographic study of Mexican immigrants employed in Silicon Valley's low-wage jobs. Christian Zlolniski's on-the-ground investigation demonstrates how global forces have incorporated these workers as an integral part of the economy through subcontracting and other flexible labor practices and explores how these labor practices have in turn affected working

conditions and workers' daily lives. In Zolniski's analysis, these immigrants do not emerge merely as victims of a harsh economy; despite the obstacles they face, they are transforming labor and community politics, infusing new blood into labor unions, and challenging exclusionary notions of civic and political membership. This richly textured and complex portrait of one community opens a window onto the future of Mexican and other Latino immigrants in the new U.S. economy.
