Nota di bibliografia	Includes bibliographical references (p. 243-247).
Sommario/riassunto	This book looks at the banking and finance industries in Italy and how these industries contribute to the Italian economy. Could these industries be the solution to the contradiction in which the country's economy has been caught for several years: it is better governed than it has been in the past, but is not growing as much as it could. The book looks at how this solution might be achieved and what factors will govern the contribution of the banking and finance industries.
