Sommario/riassunto	Drawing on interview data, the authors describe K-3 students' knowledge and thinking about basic aspects of the social world that are addressed in the elementary social studies curriculum. The interviews focused on human activities relating to nine cultural universals that are commonly addressed in the elementary social studies curriculum: food, clothing, shelter, communication, transportation, family living, childhood, money, and government. This volume synthesizes findings from the research and discusses their implications for curriculum and instruction in early social studies. Chi
