Sommario/riassunto	The expression 'Son of Man', used in the Gospels almost exclusively by Jesus, has been the object of intensive study since the Protestant Reformation, yet scholars have come to no agreement on its origin or meaning. Research in this area has been described as 'a veritable mine field' and 'a can of worms'. Because of the scope and complexity of the literature, no comprehensive survey of the subject has been written in the twentieth century. Delbert Burkett's book fills this need. It provides a comprehensive historical overview of the debate from the patristic period to 1996, and gives an evaluation of that research and a summation of the present state of the question. Burkett concludes that despite nineteen centuries of 'Son of Man' study there is no consensus concerning the meaning or origin of the expression; the debate is therefore a prime example of the limits of New Testament scholarship.

Sommario/riassunto	The editors of this book have pulled together a collection of chapters that review the spate of financial crises that have occurred in recent years starting with Mexico in 1994 and moving on to more recent crises in Turkey and Argentina. With impressive contributors such as Douglas Gale, Gabriel Palma and Andrew Gamble, the book is a timely and authoritative study. Global Governance and Financial Crises provides a new understanding of this important area with a combination of economic history and political economy as well as the most recent

developments in analytical economic theory.
