

1. Record Nr.	UNINA9910783721103321
Autore	Krishna Swamy K. S
Titolo	Dust in the universe [[electronic resource] ] : similarities and differences // K S Krishna Swamy
Pubbl/distr/stampa	Singapore ; ; London, : World Scientific, 2005
ISBN	1-281-88078-7 9786611880781 981-256-766-6
Descrizione fisica	1 online resource (266 p.)
Collana	World Scientific series in astronomy and astrophysics ; ; v. 7
Disciplina	523.1125
Soggetti	Cosmic dust Interstellar matter
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Preface; Contents; Chapter 1. General Introduction; Chapter 2. Laboratory Studies; Chapter 3. Interstellar Dust; Chapter 4. Cometary Dust; Chapter 5. Interplanetary Dust; Chapter 6. Circumstellar Dust; Chapter 7. Extragalactic Dust; Chapter 8. Epilogue; Appendix A H-R Diagram; Appendix B Stellar Evolution; Appendix C Nucleosynthesis; Appendix D Acronyms; Index
Sommario/riassunto	The study of dust in the universe is an exciting area in current astronomy. Dust formed during an earlier epoch could be different from that formed at a later time, but the nature and composition of dust is not presently understood in its entirety. The comprehensive study presented in this book provides a much needed critical analysis of different types of dust in the universe. The information derived from presolar grains from comets, meteorites and interplanetary dust particles as well as the relevant laboratory studies are discussed. This should help in our goal of understanding the evolution
