Sommario/riassunto	This book presents the results of Cleverbio, a project funded by the European Commission. The project examined the process of growth and development of clusters in the biotech industry, identifying and studying the main driving forces. The empirical work involved in-depth analysis of five clusters at different stages of development:Cambridge, the most important cluster in Europe; Heidelberg, one of the strongest

in Germany; Aarhus in Denmark; Marseille in France; and Milano in Italy at an early stage of development.
