	Sommario/riassunto	Over 95% of computers around the world are running at least one Microsoft product. Microsoft Windows Software Update Service is designed to provide patches and updates to every one of these computers. The book will begin by describing the feature set of WSUS, and the benefits it provides to system administrators. Next, the reader will learn the steps that must be taken to configure their servers and workstations to make the compatible with WSUS. A special section then follows to help readers migrate from Microsoft's earlier update service, Software Update Service (SUS) to WSUS. The nex
