Descrizione fisica	1 online resource (338 p.)
Altri autori (Persone)	HumesLarry JoellenbeckLois M <1963-> (Lois Mary) DurchJane
Disciplina	617.8/07
Soggetti	Deafness - Etiology Tinnitus - Etiology Deafness, Noise induced Acoustic trauma Soldiers - Health and hygiene Veterans - Health and hygiene Noise - Health aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	People serving in the military will, at some point, be exposed to high-intensity noise of various types. Some may develop hearing loss, especially for high-frequency sounds, or tinnitus ("ringing in the ears"), or both, as a result of their noise exposure. Hearing loss or tinnitus incurred or aggravated during military service may qualify veterans for services and financial compensation from the Department of Veterans Affairs (VA). Since World War II, the human and financial cost associated with hearing loss among military veterans have repeatedly drawn

attention to noise, hearing loss, and the need for hearing conservation
in military settings.
