Note generali	This report is the second in a series designed to improve our understanding of the technological and economic trends underlying the growth and productivity increases that have created what many refer to as the New Economy. The previous report was Productivity and Cyclicity in Semiconductor Industry--Preface (p. xiii, xvi). This symposium on Deconstructing the Computer was held on February 28, 2003, at the National Academies in Washington, D.C., focusing on metrics currently used in measuring computer performance and the sources of productivity growth in computers, examining current trends in hardware, components, and peripherals--Preface (p. xvii).
Nota di bibliografia	Includes bibliographical references (p. 156-164).
