Sommario/riassunto	This volume deals with Translation Research (TR) and Interpreting Research (IR). In the main contribution, Daniel Gile from the Université Lumière Lyon 2 (France) explores kinship, differences and prospects for partnership between the two. He gives an overview of the history of

research into translation and interpreting, explores commonalities and reviews differences between translation and interpreting, and discusses implications for research. He comments critically on the foci and paradigms in both TR and IR and on the epistemological and methodological problems they raise. He concludes by saying that Translation and Interpreting Studies are gaining both social cohesion and some weight as an academic identity. The contributions by Jan Cambridge, Andrew Chesterman, Janet Fraser, Yves Gambier, Moira Inghilleri, Zuzana Jettmarová, Ian Mason, Mariana Orozco, Franz Pöchhacker and Miriam Shlesinger focus on translator and interpreter behaviour, research methodology, types of research, disciplinary autonomy and interdisciplinarity, theory and practice, research training, and institutional constraints. There is general agreement that in view of commonalities and differences between translation and interpreting, each step in the investigation of one can contribute valuable input towards investigation of the other.

Sommario/riassunto

This atlas provides a comprehensive overview of the current techniques practised in a leading cardiac surgical institution. It offers an up-to-date review of procedures, authored by foremost surgeons in each specialist area. Richly illustrated, its aim is to serve as an appealing “go-to” text for training and practising cardiac surgeons.
