Sommario/riassunto	During her lifetime Francoise Dolto revolutionized the psychoanalytic understanding of childhood. As an early pioneer, she emphasized that the child is to be recognized from birth as a person. As a gifted and innovative clinician, Dolto developed her ideas about the unconscious

image of the body. An image that is unique to each individual and linked to both a person's history and narcissism, rather than their physicality. It is the symbolic incarnation of a person's desires. Dolto began her career as a member of the IPA, was admired by Winnicott, close to Lacan and influenced by Morgenstern.

Sommario/riassunto

This study examines issues of trade policy in the light of the experience of developing Asian economies. Case studies highlight rapidly unfolding issues in trade and development with reference to Sri Lanka, Malaysia, India, Indonesia, Pakistan, South Korea, Taiwan and Thailand. The issues explored include trade liberalization and industrial adjustment, employment and equity outcomes of export-oriented industrialization, the impact of structural adjustment reforms on savings and investment and the role of foreign direct investment in export expansion.
