Sommario/riassunto

The latest wave of European Union expansion has brought many central and Eastern European countries into the fold. Unlike previous enlargements however, the latest new members are also undergoing radical economic reform as they reintegrate into international economy. This book reviews the changing industrial architecture of the new wider Europe from a "network" perspective, highlighting the importance of the linkages that develop between firms and governments in the new entrants and the EU. It does so on the basis of a series of case studies covering countries, sectors, and firms as well
