alternative ways forward; 7 Moving the waters; Yellow River - continued source of sorrow; Water diversion; Not enough water; Competition for water

What are the alternatives? Technical concerns; 8 Ecological trappings; Atmospheric pollution; Better energy efficiency; Energy conservation; New and renewable energy; The threat of 'carmageddon'; Waste disposal; 9 Pollution on the periphery; Tibet: Land of Riches; Tibet: the Chinese case; Changing agricultural patterns; Tibet: the exiles' case; Prospects for reconciliation; Hong Kong struggles to clean up; Taiwan pays high price for growth; Analysis: common themes and contrasts; 10 Environmental policies; Environmental protection: government monopoly; The legal framework; Economic solutions
Return of blue skies International pilot projects; Individual initiatives; 11 Whither China? Alternative environmental futures; Rosy; Gloomy; Doomsday; Back to the future; Summing up; References; Bibliography; Index

Sommario/riassunto

Drawing on a wide range of Chinese and western sources, this book offers in-depth analysis of the complete range of environmental problems facing China today, from the historical, political, economic and cultural root causes, through the successful and unsuccessful efforts which have been made to find solutions, to possible future scenarios and strategies.
