

1. Record Nr.	UNINA9910783913703321
Titolo	Multiwavelength AGN surveys [[electronic resource]] : Cozumel, Mexico, 8-12 December 2003 / / editors: Raul Mujica, Roberto Maiolino
Pubbl/distr/stampa	[Hackensack], New Jersey, : World Scientific, c2004
ISBN	1-281-89848-1 9786611898489 981-270-243-1
Descrizione fisica	1 online resource (459 p.)
Altri autori (Persone)	MujicaRaul MaiolinoR (Roberto)
Disciplina	523.1/12
Soggetti	Active galactic nuclei Galactic nuclei
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Scientific Organizing Committee; Contents; Preface; Part I. AGN Surveys; X-ray Surveys; Optical and Infrared Surveys; Radio and Millimeter Surveys; Part II. Results from Surveys; Statistical Properties of Local AGN; Unification and Unconventional AGN; Spectral Energy Distribution; Luminosity Functions, Evolution and Contribution to the Cosmic Background; AGN-Galaxy Coevolution and Relic Black Holes; AGN and Large Scale Structures; Author Index
Sommario/riassunto	The huge amount of data obtained by surveys in all wavebands, from radio to X-rays, has allowed major progress in the understanding of Active Galactic Nuclei and of their cosmic evolution. This book contains the proceedings of a conference intended to give a broad overview of the recent results obtained by recent AGN surveys over the whole electromagnetic spectrum. Topics which were discussed during the conference and are included in this volume are: AGN evolution, contribution to the cosmic background, AGN luminosity functions in different wavebands, multiwavelength properties of AGN, unified
