

1. Record Nr.	UNINA9910783925703321
Titolo	Proceedings of the International Conference of Computational Methods in Sciences and Engineering 2003 (ICCMSE 2003) [[electronic resource]] : Kastoria, Greece, September 12-16 / editor, T.E. Simos
Pubbl/distr/stampa	River Edge, N.J. ; ; London, : World Scientific, c2003
ISBN	1-281-90624-7 9786611906245 981-270-465-5
Descrizione fisica	1 online resource (719 p.)
Altri autori (Persone)	Simos T. E
Disciplina	502.85 620.00113
Soggetti	Science - Data processing Engineering - Data processing
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	PREFACE FOR THE PROCEEDINGS OF THE INTERNATIONAL CONFERENCE OF COMPUTATIONAL METHODS IN SCIENCES GREECE AND ENGINEERING (ICCMSE 2003), SEPTEMBER 12-16, KASTORIA,; TABLE OF CONTENTS; 1. P. Abad, Components for Time Serie Receiver Clock Offset in GPS Solutions; 2. E. Afjei, M. H. Arbab, Magnetostatic Field Analysis by Employing Absorbing Boundary Condition; 3. Z. Akdogan, M. Demirci and O. Sh. Mukhtarov, Sturm-Liouville Problems with Eigen dependent Boundary and Transmissions Conditions; 4. T. M. Alkhamis, Computational Method for Unconstrained Optimization Functions with Noise 5. M. Al-Refai, Convergence Analysis for an Iterative Method for Solving Nonlinear Parabolic Systems 6. G. M. Amiraliyev, Uniform Numerical Method for a Quasilinear System with Boundary Layer; 7. Z. A. Anastassi and T. E. Simos, A Family of Optimized Runge-Kutta Methods with Five Stages and Fourth Order for IVPS with Oscillating Solutions; 8. R. Anguelov, P. Kama and JM-S Lubuma, Nonstandard Theta-Method and Related Discrete Schemes for the Reaction-Dirusion Equation 9. O. Angulo, J. C. Lopez-Marcos, Numerical Integration of a Size-

Structured Cell Population Model in an Environment of Changing Substrate Concentration10. I. Arregui, J. J. Cendan and C. Vazquez, A Duality Method for the Compressible Reynolds Equation. Application to Simulation of Readwrite Process in Magnetic Storage Devices; 11. F. Balibrea, J. L. C. Guirao and F. L. Pelayo, An Environment for Computing Topological Entropy for Skew-Product Transformations 12. P. G. Bagos, Th. D. Liakopoulos and S. J. Hamodrakas, Maximum Likelihood and Conditional Maximum Likelihood Learning Algorithms for Hidden Markov Models with Labeled Data-Application to Transmembr13. M. K. Banda, Variants of Relaxed Schemes and two-Dimensional Gas Dynamaics; 14. S. C. Basak, B. D. Cute and D. Mills, Predicting Toxicity of Chemicals Using Chemodescriptors and Biodescriptors: an Integrated Approach; 15. S. R. Basu, Measuring Economic Well-Being and Governance: Some Methodological Tools 16. F. A. Batzias, N. P. Nikolaou, A. S. Kakos and 1. Mihailides, Modelling the Natural Gas Consumption in a Changing Environment17. F. A. Batzias, A. S. Kakos and N. P. Nikolaou, Computer Aided Dimensional Analysis for Knowledge Management in Chemical Engineering Processes; 18. L. Bayon, J. M. Grau, M. M. Ruiz and P. Suarez, New Developments on Equivalent Thermal in Hydrothermal Optimization. An Algorithm of Approximation; 19. Di. Belkif Unique Virtues of the Pad& Approximant for High-Resolution Signal Processing 20. Y. S. Boutalis and O. I. Kosmidou, A Feedback Linearization Technique by Using Neural Networks: Application to Bioprocess control

Sommario/riassunto

In the past few decades, many significant insights have been gained into several areas of computational methods in sciences and engineering. New problems and methodologies have appeared in some areas of sciences and engineering. There is always a need in these fields for the advancement of information exchange. The aim of this book is to facilitate the sharing of ideas, problems and methodologies between computational scientists and engineers in several disciplines. Extended abstracts of papers on the recent advances regarding computational methods in sciences and engineering are provided.
