| Sommario/riassunto      | This book applies relational dialects to risk and crisis communication in order to explain how agencies and organizations navigate tensions with stakeholders and the public during high-stress situations. Littlefield and Sellnow's novel use of this interpersonal theory, which conceptually describes how couples negotiate tensions as they maintain their relationship, is exemplified through seven case studies that each focus on one common tension. |

| Sommario/riassunto      | The New Institutional Politics is a comparative study of the impact of political institutions upon outcomes, and covers some of the major themes in the new institutionalism. It looks at how various democratic institutions like Konkordanzdemokratie or corporatism promote better outcomes than Westminster institutions. The evaluation of the  |

performance of political institutions covers the executive, the legislature and the judicial system. The book also looks at economic outcomes such as affluence and GDP growth as well as social ones like income distribution and quality of life. I
