the state: observations from Tatarstan; The development of post-Soviet neo-paternalism in two enterprises in Bashkortostan: how familial-type management moves firms and workers away from labor markets; Theoretical reflections; Russia and globalisation: concluding comments; Bibliography; Index

Sommario/riassunto

The transition of Russia to a 'developed market economy' has been slower, more contradictory and less predictable than expected. This book examines contemporary Russian socio-economic development, and explores the degree to which Russian experiences can be incorporated into current social science theories. In particular, it questions how far the concept of 'globalization' is applicable to the situation in Russia.
