   Note generali   Description based upon print version of record.

   Nota di contenuto   Cover; Table of contents; Guest editorial; Aspects on the city as a
                       knowledge tool; World cities of knowledge: research strength, networks
                       and nodality; The contribution of KIBS to innovation in cities: an
                       evolutionary and institutional perspective; The region's intellectual
                       capital benchmarking system: enabling economic growth through
                       evaluation; Intellectual capital within Iberian municipalities (network); A
                       unified methodological approach for the development of knowledge
                       cities; Singapore in transition: from technology to culture hub
                       Citizen participation in decision-making processes: knowledge sharing
                       in knowledge cities Learning conversations: knowledge, meanings and
                       learning networks in Greater Manchester; The future center as an urban
                       innovation engine; Rethinking social capital theory: a knowledge
                       management perspective; Culture, cognition and knowledge-based
                       development; call for papers;

   Sommario/riassunto With this issue, the Journal of Knowledge Management begins a series
                       of annual Special Issues devoted to Knowledge-Based Development
                       (KBD), this is the third to be published on the topic and the SI is now
                       annual from 2006. In the current issue, an attempt has been made to
                       gain in consistency along a number of lines that seem to be shaping
                       this emerging field: interdisciplinarity, conceptual and methodological

variety, empirical evidence, systems approach and, particularly, strategic perspective. Interdisciplinarity is key to sustaining Knowledge-based Development as an emerging field by contr
