

1. Record Nr.	UNINA9910451347803321
Autore	DiPippo Ronald
Titolo	Geothermal power plants [[electronic resource]] : principles, applications, case studies and environmental impact / / Ronald DiPippo
Pubbl/distr/stampa	Oxford, : Butterworth-Heinemann, c2008
ISBN	1-281-07707-0 9786611077075 0-08-055476-8
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (518 p.)
Disciplina	621.44
Soggetti	Geothermal power plants Geothermal resources Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Previous ed.: Oxford: Elsevier, 2005. Includes index.
Nota di contenuto	Front Cover; Geothermal Power Plants, Second Edition; Copyright Page; Contents; Preface and Acknowledgements to the Second Edition; Preface to the First Edition; Acknowledgements to the First Edition; PART ONE: RESOURCE IDENTIFICATION AND DEVELOPMENT; Chapter 1. Geology of Geothermal Regions; 1.1 Introduction; 1.2 The earth and its atmosphere; 1.3 Active geothermal regions; 1.4 Model of a hydrothermal geothermal resource; 1.5 Other types of geothermal resources; References; Problems; Chapter 2. Exploration Strategies and Techniques; 2.1 Introduction; 2.2 Objectives of an exploration program 2.3 Phases of an exploration program 2.4 Synthesis and interpretation; 2.5 The next step: drilling; References; Problems; Chapter 3. Geothermal Well Drilling; 3.1 Introduction; 3.2 Site preparation and drilling equipment; 3.3 Drilling operations; 3.4 Safety precautions; References; Chapter 4. Reservoir Engineering; 4.1 Introduction; 4.2 Reservoir and well flow; 4.3 Well testing; 4.4 Calcite scaling in well casings; 4.5 Reservoir modeling and simulation; References; Problems; PART TWO: GEOTHERMAL POWER GENERATING SYSTEMS; Chapter 5. Single-Flash Steam Power Plants; 5.1 Introduction

5.2 Gathering system design considerations; 5.3 Energy conversion system; 5.4 Thermodynamics of the conversion process; 5.5 Example: Single-flash optimization; 5.6 Optimum separator temperature: An approximate formulation; 5.7 Environmental aspects for single-flash plants; 5.8 Equipment list for single-flash plants; References; Nomenclature for figures in Chapter 5; Problems; Chapter 6. Double-Flash Steam Power Plants; 6.1 Introduction; 6.2 Gathering system design considerations; 6.3 Energy conversion system; 6.4 Thermodynamics of the conversion process; 6.5 Example: Double-flash optimization; 6.6 Scale potential in waste brine; 6.7 Environmental aspects for double-flash plants; 6.8 Equipment list for double-flash plants; References; Nomenclature for figures in Chapter 6; Problems; Chapter 7. Dry-Steam Power Plants; 7.1 Introduction; 7.2 Origins and nature of dry-steam resources; 7.3 Steam gathering system; 7.4 Energy conversion system; 7.5 Example: Optimum wellhead pressure; 7.6 Environmental aspects of dry-steam plants; 7.7 Equipment list for dry-steam plants; References; Nomenclature for figures in Chapter 7; Problems; Chapter 8. Binary Cycle Power Plants; 8.1 Introduction; 8.2 Basic binary systems; 8.3 Working fluid selection; 8.4 Advanced binary cycles; 8.5 Example of binary cycle analysis; 8.6 Environmental impact of binary cycles; 8.7 Equipment list for basic binary plants; References; Nomenclature for figures in Chapter 8; Problems; Chapter 9. Advanced Geothermal Energy Conversion Systems; 9.1 Introduction; 9.2 Hybrid single-flash and double-flash systems; 9.3 Hybrid flash-binary systems; 9.4 Example: Integrated flash-binary hybrid system; 9.5 Total-flow systems; 9.6 Hybrid fossil-geothermal systems; 9.7 Combined heat and power plants; 9.8 Hot dry rock (enhanced geothermal systems)

Sommario/riassunto

Ron DiPippo, Professor Emeritus at the University of Massachusetts Dartmouth, is a world-regarded geothermal expert. This single resource covers all aspects of the utilization of geothermal energy for power generation from fundamental scientific and engineering principles. The thermodynamic basis for the design of geothermal power plants is at the heart of the book and readers are clearly guided on the process of designing and analysing the key types of geothermal energy conversion systems. Its practical emphasis is enhanced by the use of case studies from real plants that increase the reader's understanding and appreciation of the subject.

subject of women: the sensation novel and the 'Girl of the Period'; 11 Historicising genre (2): sensation fiction, women's genres and popular narrative forms; 12 Mary Elizabeth Braddon: the secret histories of women; 13 Ellen Wood: secret skeletons in the family, and the spectacle of women's suffering; Part III Breaking the Bounds: The Improper Feminine and the Fiction of the New Woman
14 The New Woman 15 The New Woman writing and some marriage questions; 16 Writing difference differently; 17 Feeling, motherhood and True Womanhood; 18 Woman's 'affectability' and the literature of hysteria; 19 Writing women: writing woman; 20 New Woman: new writing; Conclusion: reading out women's writing; Notes; Works referred to; Index

Sommario/riassunto

The women's sensation novel of the 1860's and the New Woman fiction of the 1890's were two major examples of a perceived feminine invasion of fiction which caused a critical furor in their day. Both genres, with their shocking, 'fast' heroines, fired the popular imagination by putting female sexuality on the literary agenda and undermining the 'proper feminine' ideal to which nineteenth-century women and fictional heroines were supposed to aspire. By exploring in impressive depth and breadth the material and discursive conditions in which these novels were produced, *The 'Improper'*

Sommario/riassunto

Western thought has long been characterized by an ideological divide between public and private spheres. In the industrial era, the divide became highly gendered as men dominated the public spheres of politics and work, while women were closely associated with family and home. In the late twentieth century, social and legal policies have promoted equal opportunities in the labour force and shared responsibilities in the family. Despite this progress, inequalities are still evident for women in the labour force and in the family, and for some groups of women in relation to others. In this collection of original essays, feminist scholars in disciplines ranging from law to geography challenge the traditional notion of a public/private divide. The divide can represent boundaries between state and family, state and market, market and family, or state and community, which shift depending on location, social group, and historical time period. The contributors to this book examine the impact of the divide in respect to four themes: state intervention; the relationship between family, home, and work; the legal regulation of motherhood; and the challenges of privatization, restructuring, and globalization. They show that the impact of the divide varies according to factors such as race, class, (dis)ability, and sexual identity as they intersect with gender. Challenging the Public/Private Divide provides a wealth of information and analysis on current issues in Canada society, from child care to violence against women. Its impact will be felt in diverse disciplines, such as: law, public administration, political science, sociology, women's studies, and criminology.
