| Nota di contenuto       | Becoming urban in China -- Historical traces -- Regional policies --<br>Urbanization of the countryside -- New spatial mobilities -- Expanding<br>spaces of personal autonomy -- The governance of city-building --<br>Backward into the future.                                                                                                                                                                               |
| Sommario/riassunto      | It is only in the past quarter century that urbanization has emerged in<br>China as a force of social transformation while a massive population<br>shift from country to city has brought about a dramatic revolution in<br>China's culture, politics, and economy. China's Urban Transition<br>synthesizes research to provide the first integrated treatment of the<br>processes that encompass the meaning of urbanization. |
