

1. Record Nr.	UNINA9910784150503321
Autore	Andrews David
Titolo	Lumped element quadrature hybrids // David Andrews
Pubbl/distr/stampa	Boston : , : Artech House, , ©2006 [Piscataqay, New Jersey] : , : IEEE Xplore, , [2006]
ISBN	1-58053-602-6
Descrizione fisica	1 online resource (230 p.)
Collana	Artech House microwave library
Disciplina	621.381/32
Soggetti	Lumped elements (Electronics) Microwave integrated circuits Radio frequency integrated circuits Curves - Rectification and quadrature
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Lumped Element Quadrature Hybrids; Contents; Preface ix; 1 Overview of Quadrature Hybrids 1; 2 Basic Theory 19; 3 Approximations 35; 4 Passive Synthesis 75; 5 Practical Design 129; 6 Special Topics 169; Glossary 203; Bibliography 207; About the Author 211; Index 213
Sommario/riassunto	Annotation Quadrature hybrids are passive circuit elements that are used in a wide range of RF and microwave applications, and this cutting-edge book is the first resource to provide engineers with a solid understanding of their characteristics and design. The book helps professionals use lumped element quadrature hybrids to achieve extremely wide bandwidth operation. This hands-on volume provides detailed construction techniques with worked examples, and describes the synthesis of circuits using practical circuit topologies. Moreover, the book discusses a wide-range of related topics, including active circuits, weak couplers, non-quadrature dividers, and tips on using graphical techniques. This comprehensive reference is thoroughly supported with over 225 illustrations and more than 200 equations.
