Sommario/riassunto	This first history of the Rashidi Ahmadiyya argues for a new explanation of the great Sufi revival of the eighteenth century, and also defines a new paradigm of development and change in Sufi orders. In his study of one widespread Sufi order over two centuries and three continents, the author identifies a repeating cycle in which a section of an order rises under a great shaykh, splits, and stabilizes. Though each

great shaykh seems to remake the order with little reference to what has gone before, there are in fact two constants through all cycles: the written literature of the order, and the limiting effect on even the greatest shaykhs of their followers' expectations.
