

1. Record Nr.	UNINA9910784260903321
Titolo	Imaging in SARS // [edited by] A.T. Ahuja, C.G.C. Ooi [[electronic resource]]
Pubbl/distr/stampa	London : , : Greenwich Medical Media Limited, , 2004
ISBN	1-107-15696-3 1-280-51621-6 9786610516216 0-511-21407-3 0-511-21586-X 0-511-21049-3 0-511-31488-4 0-511-54534-7 0-511-21226-7
Descrizione fisica	1 online resource (ix, 182 pages) : digital, PDF file(s)
Disciplina	616.2207547
Soggetti	SARS (Disease) Diagnostic imaging
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Title from publisher's bibliographic system (viewed on 05 Oct 2015).
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The epidemiology of severe acute respiratory syndrome: a global perspective / M. Evans -- The role of emergency medicine in screening SARS patients / T.H. Rainer and P. Cameron -- Severe acute respiratory syndrome outbreak in a university hospital in Hong Kong / N. Lee and J. J.Y. Sung -- Imaging of pneumonias / G.C. Ooi and P.L. Khong -- The role of chest radiographs in the diagnosis of SARS / K.T. Wong [and others] -- Chest radiography: clinical correlation and its role in the management of severe acute respiratory syndrome / D.S.C. Hui [and others] -- The role of high-resolution computed tomography in diagnosis of SARS / G.E. Antonio [and others] -- The role of imaging in the follow-up of SARS / G.E. Antonio [and others] -- Treatment of severe acute respiratory syndrome / J.J.Y. Sung and A.K. Wu -- SARS in the intensive care unit / G.M. Joynt, G.E. Antonio and C.D. Gomersall --

Imaging of pneumonia in children / W.C.W. Chu -- Imaging and clinical management of paediatric SARS / W.C.W. Chu [and others] -- Imaging of SARS in North America / N.L. Muller and H. Shulman -- Radiographers' perspective in the outbreak of SARS / S.S.Y. Ho -- Implementation of measures to prevent the spread of SARS in a radiology department / A.D. King and A.S.C. Ching -- Aftermath of SARS / G.E. Antonio, J.F. Griffith and A.T. Ahuja -- Update on severe acute respiratory syndrome / A.T. Ahuja and G.E. Antonio.

Sommario/riassunto

Severe acute respiratory syndrome (SARS) is a devastating disease and although the virus would appear to have been contained, it is clear that the impact it has had around the world, and could have again in the future, is immense. Hong Kong has been significantly impacted in the recent SARS outbreak, and clinicians and researchers alike have gained a lot of experience in dealing with the disease at short notice. This new book aims to be a state-of-the art update on SARS, with particular reference to imaging, which plays a crucial role in the diagnosis, management and follow-up of patients with the disease (it is widely accepted that SARS patients cannot be managed without imaging and it is included in the WHO's own list of diagnostic criteria for the disease). The book will also provide a perspective on the treatment and experience of the disease outside Hong Kong.
