

1. Record Nr.	UNINA9910784286903321
Autore	Jacrot Bernard
Titolo	Energie et formulation [[electronic resource]]
Pubbl/distr/stampa	Les Ulis, : EDP Sciences, 2005
ISBN	1-280-96088-4 9786610960880 1-4237-6956-2 2-7598-0143-8
Descrizione fisica	1 online resource (188 p.)
Collana	Cahiers de formulation ; ; Vol. 13
Disciplina	541.351
Soggetti	Science Chemistry Physics Physical Sciences & Mathematics Physics - General
Lingua di pubblicazione	Francese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	Production et transport de l'énergie; Preface; Carburants et lubrifiants; Propergols et explosifs; Interaction énergie-matière en formulation; Energie électrique et formulation; Index des sujets; Les cahiers de Formulation:sommaire des volumes précédents;
Sommario/riassunto	Energy is distributed, transformed and contained in many ways most of which depend on formulation. This work deals with diverse applications. It was written for teachers, researchers and engineers and will be of interest as much for the beginner who is eager to learn about this field as for the professional seeking original answers in the vast domain of energy.
