

1. Record Nr.	UNINA9910784292003321
Autore	Declerck Renaat
Titolo	The grammar of the English tense system [[electronic resource]] : a comprehensive analysis // by Renaat Declerck in cooperation with Susan Reed and Bert Cappelle
Pubbl/distr/stampa	Berlin ; ; New York, : Mouton de Gruyter, c2006
ISBN	1-282-19493-3 9786612194931 3-11-019988-2
Descrizione fisica	1 online resource (856 p.)
Collana	Topics in English linguistics ; ; 60.1 The grammar of the English verb phrase ; ; v. 1
Classificazione	HF 310
Altri autori (Persone)	ReedSusan <1949-> CappelleBert <1975->
Disciplina	425/.62
Soggetti	English language - Tense English language - Grammar
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [831]-832) and index.
Nota di contenuto	Front matter -- Table of contents -- 1. Introduction -- 2. Towards a theory of tense and time -- 3. The absolute use of the present tense -- 4. The absolute past tense -- 5. The absolute use of the present perfect -- 6. The present perfect vs the preterite in clauses without temporal adverbials -- 7. Absolute tense forms referring to the post-present -- 8. Temporal domains and relative tenses: theoretical foundations -- 9. Temporal subordination in the various time-zones -- 10. Two tense systems with post-present reference -- 11. Tense choice determined by temporal focus -- 12. Preterite vs present perfect in clauses with temporal adverbials -- 13. Adverbial when-clauses and the use of tenses -- 14. Adverbial before-clauses and after-clauses -- Backmatter
Sommario/riassunto	The Grammar of the English Tense System forms the first volume of a four-volume set, The Grammar of the English Verb Phrase. The other volumes, to appear over the next few years, will deal with mood and modality, aspect and voice. The book aims to provide a grammar of tense which can be used both as an advanced reference grammar (for

example by MA-level or postgraduate students of English or linguistics) and as a scientific study which can act as a basis for and stimulus to further research. It provides not only a wealth of data but also a unique framework for the study of the English tense system, which achieves great predictive and explanatory power on the basis of a limited number of relatively simple rules. The framework provided allows for an analysis of the semantics of individual tenses which reflects the role of tenses not only in locating situations in time relative to speech time but also in relating situations in time relative to one another to form temporally coherent discourse. Attention is paid to the relations between tenses. On the one hand, we can identify sets of tenses linked to particular temporal areas such as the past or the future. These sets of tenses provide for the expression of a system of temporal relations in a stretch of discourse in which all the situations are located within the same temporal area. On the other hand, there are many contexts in which speakers might in theory choose between two or more tenses to locate a situation (e.g., when we choose between the past tense and the present perfect to locate a situation before speech time), and the book examines the difference that a choice of one or the other tense may make within a discourse context. The book moves from a detailed exploration of the meaning and use of individual tenses to a thorough analysis of the way in which tenses can be seen to function together as sets, and finally to a detailed examination of tenses in, and tenses interacting with, temporal adverbials. Original data is used frequently throughout the book to illustrate the theory discussed.
