Oldhafer Chapter 12 Haemostasis: A Synopsis of History and Progress --- Evaluation of Cross-Linked Gelatin/Resorcinol/Aldehyde as a

Haemostatic Agent and Tissue Adhesive Rajinder P. Singh, Nadey
Hakim, Veena MIndex

Sommario/riassunto

This unique volume presents the cutting edge of haemostasis in surgery and includes the advances in the science pertaining to related important medical and surgical problems. It is the only book that includes all the surgical subspecialties focusing specifically on the problems of haemostasis in each field. State-of-the-art laboratory and clinical reviews are included and modern devices used in the different specialties are also covered. The contributors are well-known authorities in their special fields and haematological area. Each is covered comprehensively with special emphasis on unanswer
