Sommario/riassunto	The effects of digital technology on the security industry require constant vigilance by security distributors, sales staff, and installation professionals. Today and for the foreseeable future, all security professionals must have at least a basic understanding of digital technology. Digital CCTV addresses this new challenge. Topics covered include compression variables such as Lossless and Lossy, which are explained by reviewing Huffman and Run Length Encoding (RLE), and by relating these forms of compression to ZIP and Stuffit,

which are commonly used in personal computers

6. Record Nr.	UNINA9910970448903321
Autore	Barker Philip J

Nota di contenuto	Tales of shipwrecks and castaways -- Philosophical assumptions : a credo -- Throwing out the lifelines : the meaning of caring -- Manning the lifeboats : the tidal model in practice -- A map of the territory -- The self domain : the need for emotional security -- The assessment of suicide risk -- Bridging : engaging with the self in crisis -- The world domain : planning holistic care -- The others domain : an anchor in the social world -- The lantern on the stern : individual care -- All hands to the pumps : group care -- Making waves : theoretical and philosophical undercurrents -- Origins and developments : in the shallows and in the deep -- The voyage from recovery to reclamation -- The compass : the ten commitments.
Sommario/riassunto	The Tidal Model represents a significant alternative to mainstream mental health theories, emphasising how those suffering from mental health problems can benefit from taking a more active role in their own

treatment. Based on extensive research, The Tidal Model charts the development of this approach, outlining the theoretical basis of the model to illustrate the benefits of a holistic model of care which promotes self-management and recovery. Clinical examples are also employed to show how, by exploring rather than ignoring a client's narrative, practitioners can en
