Sommario/riassunto

In the knowledge economy, the value of corporations is directly related to their knowledge and intellectual capital. But broaden the perspective a little wider and you begin to see the possibilities: Think of cities, regions, even entire nations, in addition to the public sector. If intangibles and intellectual capital are important to the private sector, they are also important to the productivity and competitiveness of the public sector, and so to communities and nations as a whole. In this book, Editors Ahmed Bounfour and Leif Edvinsson have brought together the best minds in intellectual
