Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 145-154) and index.
Nota di contenuto	Critical bodies -- From colonial medicine to world health -- Official maps -- A dying epidemiology.
Sommario/riassunto	In Globalizing AIDS, pioneering cultural critic Cindy Patton looks at the complex interaction between modern science, media coverage, and local activism during the first decade of the epidemic. Patton's critique of both the production of scientific credibility and the implementation of public health policy at the local level offers a bold reevaluation of how we think about AIDS and an innovative approach to the reality of the disease.
