Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Cover; Rinderpest and Peste des Petits Ruminants Virus Plagues of Large and Small Ruminants; Dedication; Contents; Contributors; Series Introduction: Biology of Animal Infections; Foreword; Preface; Acknowledgements; Abbreviations; List of Plates; Rinderpest: a general introduction; The morbilliviruses; Molecular biology of the morbilliviruses; Rinderpest and peste des petits ruminants - the diseases: clinical signs and pathology; Rinderpest - an old and worldwide story: history to c.1902; Rinderpest in the twentieth and twenty-first centuries; Rinderpest and wildlife Diagnosis of rinderpest virus and peste des petits ruminants virusOld prophylactic methods; Immunology of rinderpest - an immunosuppression but a lifelong vaccine protection; History of vaccines and vaccination; New generation vaccines against rinderpest and peste des petits ruminants; Use of rinderpest vaccine in international programmes for the control and eradication of rinder-; Strategy for measles eradication; Towards the global eradication of rinderpest; Conclusions; Biographical notes on key players in rinderpest

study and control; Index

Sommario/riassunto

Rinderpest and Peste des Petits Ruminants tells the story of how, by the year 2010, scientists are set to globally eradicate one of the great historic plagues that has ravaged human livestock for centuries.

Descriptions of the disease in Europe date back to the 4th century and it was regularly re-introduced following wars and other civil unrest until late in the 19th century. It was introduced with devastating effect into Africa towards the end of the 19th century and is now widespread across sub-Saharan Africa, the Middle East and Southern Asia. Its causative agent, rinderpest virus, a
