

1. Record Nr.	UNINA9910784548403321
Titolo	Qualitative research methods for psychologists [[electronic resource] ] : introduction to empirical studies // [edited] by Constance T. Fischer
Pubbl/distr/stampa	Amsterdam ; ; Boston, MA, : Elsevier Academic Press, 2005
ISBN	1-280-63327-1 9786610633272 0-08-045412-7
Descrizione fisica	1 online resource (506 p.)
Altri autori (Persone)	FischerConstance T. <1938->
Disciplina	150/.72
Soggetti	Psychology - Research - Methodology Qualitative research
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	An assimilation analysis of psychotherapy : responsibility for being there / Lara Honos-Webb ... [et al.] -- Exploring psychotherapy with discourse analysis : chipping away at the mortar / Anna Madill -- The grounded theory method : application of a variant of its procedure of constant comparative analysis to psychotherapy research / David L. Rennie -- Phenomenological analysis : impression formation during a clinical assessment interview / Scott D. Churchill -- Diagnostic discourse in patient-staff interactions : a conversation analysis clarified by participant interviews / Jessie Goicoechea -- Honor and respect : feminist collaborative research with sexually abused women / Susan L. Morrow -- An empirical, phenomenological study : being joyful / Brent Robbins -- Conceptual encounter : the experience of anger / Joseph de Rivera -- Emergence of the dialogal approach : forgiving another / Steen Halling, Michael Leifer, and Jan O. Rowe -- A thematic analysis of written accounts : thinking about thought / Howard R. Pollio and Michael J. Ursiak -- Intuitive inquiry : an exploration of embodiment among contemporary female mystics / Vipassana Esbjorn-Hargens and Rosemarie Anderson -- An application of experiential method in psychology : what is it like to be a stranger in a foreign land / Arne Collen -- Focus groups and related rapid assessment methods : identifying psychoeducational HIV/AIDS interventions in Botswana /

Lisa Levers.

**Sommario/riassunto**

This collection of 14 original articles teaches readers how to conduct qualitative research. Instead of characterizing and justifying certain methods, the contributors show by means of actual research studies what assumptions, procedures, and dilemmas they encountered. Fischer's introduction, which emphasizes the practical nature of qualitative research and the closing chapter, which uses a question-and-answer format to investigate, among other subjects, what is scientific about qualitative research, are complemented by a glossary and other features that increase the book's utility and value.<

**Sommario/riassunto**

Mitochondria are tiny structures within all our cells, believed to have once evolved from bacteria living independent lives. Drawing on cutting edge research, this book explores the fundamental role they play in some of the biggest themes in biology: evolution, the origin of the sexes, in growth, ageing, disease, and in death.
