

1. Record Nr.	UNINA9910784569903321
Titolo	Control in power electronics [[electronic resource]] : selected problems // editors, Marian P. Kazmierkowski, R. Krishnan, Frede Blaabjerg
Pubbl/distr/stampa	Amsterdam ; ; Boston, : Academic Press, c2002
ISBN	1-281-00540-1 9786611005405 0-08-049078-6
Descrizione fisica	1 online resource (529 p.)
Collana	Academic Press series in engineering
Altri autori (Persone)	KazmierkowskiMarian P KrishnanR (Ramu) BlaabjergFrede
Disciplina	621.31/7 22 621.317
Soggetti	Electronic control Power electronics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Front Cover; Control in Power Electronics; Copyright Page; Contents; Preface; List of Contributors; Part I: PWM Converters: Topologies and Control; Chapter 1. Power Electronic Converters; Chapter 2. Resonant dc Link Converters; Chapter 3. Fundamentals of the Matrix Converter Technology; Chapter 4. Pulse Width Modulation Techniques for Three-Phase Voltage Source Converters; Part II: Motor Control; Chapter 5. Control of PWM Inverter-Fed Induction Motors; Chapter 6. Energy Optimal Control of Induction Motor Drives Chapter 7. Comparison of Torque Control Strategies Based on the Constant Power Loss Control System for PMSMChapter 8. Modeling and Control of Synchronous Reluctance Machines; Chapter 9. Direct Torque and Flux Control (DTFC) of ac Drives; Chapter 10. Neural Networks and Fuzzy Logic Control in Power Electronics; Part III: Utilities Interface and Wind Turbine Systems; Chapter 11. Control of Three-Phase PWM Rectifiers; Chapter 12. Power Quality and Adjustable Speed Drives; Chapter 13. Wind Turbine Systems; Index
Sommario/riassunto	The authors were originally brought together to share research and

applications through the international Danfoss Professor Programme at Aalborg University in Denmark. Personal computers would be unwieldy and inefficient without power electronic dc supplies. Portable communication devices and computers would also be impractical. High-performance lighting systems, motor controls, and a wide range of industrial controls depend on power electronics. In the near future we can expect strong growth in automotive applications, dc power supplies for communication systems, portable applications,
