| Note generali           | Description based upon print version of record.   |
| Nota di bibliografia    | Includes bibliographical references (p. [267]-281) and index.   |
| Nota di contenuto       | Genesis as the basic problem of phenomenology -- The critique of phenomenology : an investigation of "'Genesis and structure' and phenomenology" -- The critique of ontology : an investigation of "the ends of man" -- Upping the ante on dialectic : an investigation of Le probleme de la genese dans la philosophie de Husserl -- The root, that is necessarily one, of every dilemma : an investigation of the introduction to Husserl's The origin of geometry -- More metaphysical than metaphysics : an investigation of "violence and metaphysics" -- The test of the sign : an investigation of voice and phenomenon -- Looking for noon at two o'clock : an investigation of specters of Marx -- The final idea : memory and life. |
| Sommario/riassunto      | Lawlor illuminates Husserl's influence on the French philosophical tradition that inspired Derrida's thought. Beginning with Eugen Fink's pivotal essay on Husserl's philosophy, he carefully reconstructs the conceptual context in which Derrida developed his interpretation of Husserl.   |
