Sommario/riassunto	In this important new historical study, Maria Kovacs examines the struggle between liberal and anti-Semitic policies among professional groups--doctors, lawyers, engineers--in Hungary. Kovacs's main emphasis is on the interwar period when unemployment, expansion of the welfare system, and competition for state jobs during the Great Depression, combined with crass anti-Semitism on the part of engineers and medical associations, radically altered previously liberal policies of open entry and equal educational opportunity.
