

1. Record Nr.	UNINA9910784708003321
Autore	MacNeilage Peter F
Titolo	The origin of speech [[electronic resource] /] / Peter F. MacNeilage
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, c2008
ISBN	1-281-34132-0 9786611341329 0-19-152865-X
Descrizione fisica	1 online resource (402 p.)
Collana	Studies in the evolution of language ; ; no. 10
Classificazione	17.12
Disciplina	801
Soggetti	Language and languages - Origin Linguistics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Contents; List of Figures; List of Tables; Acknowledgments; Part I: Introduction; Part II: Speech and its origin: the frame/content theory; Part III: The relation between ontogeny and phylogeny; Part IV: Brain organization and the evolution of speech; Part V: The frame/content theory and generative linguistics; Part VI: A perspective on speech from manual evolution; Part VII: Last things; References; Index
Sommario/riassunto	This important and original account of the origin and evolution of speech integrates the latest research in speech, acquisition, and neurobiology, and includes the key observation that infants learning language reveal similar constraints to those acting on our distant ancestors. It is written in a clear style with minimal recourse to jargon. - ;This book explores the origin and evolution of speech. The human speech system is in a league of its own in the animal kingdom and its possession dwarfs most other evolutionary achievements. During every second of speech we unconsciously use about 225 d
