1. Record Nr.   UNINA9910784729303321

   Titolo   Information management & computer security . Volume 15, Number 5
                        Papers from the HAISA 2007 Symposium [[electronic resource]]

   Pubbl/distr/stampa   [Bradford, England], : Emerald, 2007

   ISBN   1-281-14365-0
                        9786611143657
                        1-84663-697-3

   Descrizione fisica   1 online resource (100 p.)

   Collana   Information Management and Computer Security - Volume 15, Issue 5

   Disciplina   658.4/038

   Soggetti   Computer security
                        Information technology - Management
                        Management information systems

   Lingua di pubblicazione   Inglese

   Formato   Materiale a stampa

   Livello bibliografico   Monografia

   Note generali   Description based upon print version of record.

   Nota di bibliografia Includes bibliographical references.

   Nota di contenuto   Cover; CONTENTS; EDITORIAL ADVISORY BOARD; Guest editorial;
                        Comply! Resistance is futile; Vendor availability: a key factor for
                        outsourcing in Chilean ICT sector; How well are information risks being
                        communicated to your computer end-users?; User-centred security
                        applied to the development of a management information system;
                        Improving protection mechanisms by understanding online risk; Usable
                        set-up of runtime security policies; Toward viable information security
                        reporting systems; On the imbalance of the security problem space and
                        its expected consequences

   Sommario/riassunto   The first two papers in this e-book give a global perspective on
                        Information Management issues. The remaining papers are security-
                        focused, and have been selected for inclusion from the International
                        Symposium on Human Aspects of Information Security & Assurance
                        (HAISA 2007), which took place in Plymouth, UK, on 10 July 2007. The
                        theme of the event reflected that a significant aspect of protection
                        comes down to the attitudes, awareness, behaviour and capabilities of
                        the people involved.
