Sommario/riassunto	This unique book is written by Barbara Bain, a leading haematologist with a reputation for her educational prowess in the field. It provides a concise overview of the haemoglobinopathies and focuses on the selection, performance, and interpretation of relevant laboratory tests. The tests dealt with are mainly those done regularly in diagnostic haematology laboratories. Where more specialist tests are required, the reader is given an overview of what the specialist centre will do, with guidance on what the result will imply. This book is extremely practical in orientation and i
