

1. Record Nr.	UNINA9910784844803321
Autore	Schluter Thomas
Titolo	Geological atlas of Africa [[electronic resource]] : with notes on stratigraphy, tectonics, economic geology, geohazards and geosites of each country // Thomas Schluter ; with contributions by Martin H. Trauth
Pubbl/distr/stampa	Berlin, : Springer, 2008
ISBN	1-281-31433-1 9786611314330 3-540-76373-2
Edizione	[2nd four-coloured rev. and enl. ed.]
Descrizione fisica	1 online resource (318 p.)
Altri autori (Persone)	TrauthMartin H
Disciplina	556 912.6
Soggetti	Geology - Africa Africa Maps
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Two columns to the page.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Aims and Concepts of the Atlas -- Early Geological Maps of Africa -- Tectonostratigraphic Synopsis -- Review of Countries and Territories.
Sommario/riassunto	This atlas is intended primarily for anybody who is in some background for the arrangement of how the interested in basic geology of Africa. Its originality lies in the way the atlas was done. The second chapter is devoted to the fact that the regional geology of each African country is reviewed country-wise by maps for a fuller appreciation of why this work in Africa is and text, a view normally not presented in textbooks worth doing. Chapter 3 provides an executive summary of regional geology. It is my belief, that there has long been a need in universities and geological surveys, worldwide, in the context of no political boundaries, both in Africa and in the developed world, for summarizing geological maps and an accompanying basic alphabetical order of each African country or territory text utilising the enormous fund of knowledge that is presented by a digitized geological overview map

has been accumulated since the beginning of geologi- and an
accompanying text on its respective strat- th cal research in Africa in
the mid-19 century. I hope raphy, tectonics, economic geology,
geohazards and that, in part, the present atlas may satisfy this need.
geosites. A short list of relevant references is also a- ed.
