1.	Record Nr.	UNINA9910784882803321
	Autore	Chen Wai-Fah <1936->
	Titolo	My life's journey [[electronic resource] =] : Wo di sheng ya yu xing si : reflections of an academic / / Wai-Fah Chen
	Pubbl/distr/stampa	Hackensack, N. J., : World Scientific, c2007
	ISBN	1-281-91902-0
		9786611919023
		981-277-014-3
	Descrizione fisica	1 online resource (464 p.)
	Disciplina	624.1092
	Soggetti	Civil engineers - United States
		Civil engineering - Study and teaching (Higher) - United States
		Structural engineering - Research - United States
		China History 20th century
		Taiwan History 1945-
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Preface ; Contents; 1. The Civil War .; 1.1 My Childhood ; 1.2 The Escape ; 1.3 Experience in Taiwan ; 1.4 Remembering Father -; 2. The Wisdom of Class 33 ; 2.1 The Legacy ; 2.2 The Cardinal Rules for Senior Life ; 2.3 On Marriage ; 2.4 On Family ; 2.5 On Aging Parents ; 2.6 On Economics 101 ; 2.7 On Health ; Appendix 2.1 W.F. Speech for Brian's Wedding ; Appendix 2.2 Eric's Speech for Brian's Wedding ; Appendix 2.3 Suh and Hsuan Wedding Ceremony ; 3. The Voyage to America ; 3.1 The Start ; 3.2 Voyage to San Francisco 3.3 Summer Jobs in New York 3.4 Settled Down at Lehigh ; 3.5 Looking Back ; 3.6 Joining the Elite Group ; 4. My Lifelong Companion-Linlin ; 4.1 The Romance ; 4.2 The Wedding ; 4.3 The Hsuan's Family ; 4.4 Linlin's Business Adventure ; 4.5 The Chen's Family ; 5. Academic Career at Lehigh ; 5.1 The Leader - Lynn S. Beedle ; 5.2 On Structural Connections ; 5.3 On Beam-Columns ; 5.4 On Limit Analysis and

Sommario/riassunto	Dr Wai-Fah Chen - a Chinese-born American academic and widely recognized structural engineering specialist in the field of mechanics, materials, and computing - has certainly led a fascinating life. A well-respected leader in the field of plasticity, structural stability, and structural steel design over the past half-century, he has made major contributions to introduce the mathematical theory of plasticity to civil engineering practice, especially in the application of limit analysis methods to the geotechnical engineering field. Having headed the engineering departments at the University of
