

1. Record Nr.	UNINA9910784896503321
Titolo	Experimental approaches to phonology [[electronic resource] /] / edited by Maria-Josep Sole, Patrice Speeter Beddor, and Manjari Ohala
Pubbl/distr/stampa	Oxford ; ; New York, : Oxford University Press, 2007
ISBN	1-383-04407-4 1-281-15509-8 9786611155094 0-19-153796-9
Descrizione fisica	1 online resource (484 p.)
Collana	Oxford linguistics
Altri autori (Persone)	SoleMaria-Josep BeddorPatrice Speeter OhalaManjari
Disciplina	414
Soggetti	Grammar, Comparative and general - Phonology Linguistic universals Language and languages - Variation Linguistic change
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [411]-456) and index.
Nota di contenuto	Methods in phonology / John J. Ohala -- Elicitation as experimental phonology : Thlantlang Lai tonology / Larry M. Hyman -- Decisions and mechanisms in exemplar-based phonology / Keith Johnson -- Beyond laboratory phonology : the phonetics of speech communication / Klaus J. Kohler -- Area functions and articulatory modeling as a tool for investigating the articulatory, acoustic, and perceptual properties of sounds across languages / Jacqueline Vaissiere -- Phonological universals and the control and regulation of speech production / Didier Demolin -- Issues of phonological complexity : statistical analysis of the relationship between syllable structures, segment inventories, and tone contrasts / Ian Maddieson -- Linking dispersion-focalization theory and the maximum utilization of the available distinctive features principle in a perception for action control theory / Jean Luc Schwartz, Louis Jean Boe, Christian Abry -- Applying perceptual methods to the study of phonetic variation and sound change / Patrice Speeter Beddor,

Anthony Brasher, Chandan Narayan -- Interpreting misperception : beauty is in the ear of the beholder / Juliette Blevins -- Coarticulatory nasalization and phonological developments : data from Italian and English nasal-fricative sequences / M. Grazia Busa -- A perceptual bridge between coronal and dorsal / Olle Engstrand, Johan Frid, Bjorn Lindblom -- Danish stød : phonological and cognitive issues / Nina Grønnum, Hans Basbøll --
Articulatory movements and phrase boundaries / Patrizia Bonaventura, Osamu Fujimura -- Physiological and physical bases of the command-response model for generating fundamental frequency contours in tone languages : implications for the phonology of tones / Hiroya Fujisaki, Wentao Gu, Sumio Ohno -- Probabilistic "sliding template" models for indirect vowel normalization / Terrance M. Nearey, Peter Assmann --
The variations, quantification, and generalizations of standard Thai tones / Rungpat Roengpitya -- Controlled and mechanical properties in speech : a review of the literature / Maria Josep Sole -- What's in CVC-like things? : ways and means to look at phonological units across languages / Bruce L. Derwing -- The SLIP technique as a window on the mental preparation of speech : some methodological considerations / Sieb Nooteboom, Hugo Quene -- Experimental methods in the study of Hindi geminate consonants / Manjari Ohala -- Morphophonemics and the lexicon : a case study from Turkish / Anne Pycha, Sharon Inkelas, Ronald Sprouse -- How do listeners compensate for phonology? / Eurie Shin.

Sommario/riassunto

This book provides fresh insights into the findings and theoretical advances that emerge from experimental investigation of phonological structure and phonological knowledge as well as a critical perspective on experimental techniques and methods in the perception, production, and modeling of speech. - ;This wide-ranging survey of experimental methods in phonetics and phonology shows the insights and results provided by different methods of investigation, including laboratory-based, statistical, psycholinguistic, computational-modeling, corpus, and field techniques. The five chapters in the fi
