Lessons from Aceh: Sue Kenny and Matthew Clarke (Deakin University); Afterword - Reconstructing the Invisible Landscape: Ismet Fanany (Deakin University); Index

Sommario/riassunto

On Sunday 26 December 2004, a tsunami of up to 30 metres high hit the northern tip of Sumatra in Indonesia, causing immediate destruction and the deaths of at least 130,000 in Indonesia alone. The scale of the devastation and ensuing human suffering prompted the biggest response endeavour to any natural disaster in history. Post-Disaster Reconstruction will be the first major book that analyses the different perspectives and experiences of the enormous post-tsunami reconstruction effort. It looks specifically at the reconstruction efforts in Aceh, one of the regions most heavily-hit by the tsunami.
