Sommario/riassunto	Following 82 years of British rule, Cyprus emerged in 1960 as an independent state endowed with a written Constitution, detailed to the extent of making provision for nearly every aspect of government. Two distinct features of the Constitution are a) the incorporation of a comprehensive charter of human rights backed up by a duty cast on every authority of the State to ensure its efficient application and b) the strict separation between the three powers of the State. Another notable aspect of it is the introduction of judicial review of administrative action rendering justiciable every act, decision or omission of every organ, body or person exercising administrative or executive authority. The diversity of the sources of constitutional order, its detailed provisions about nearly every aspect of government convey

a distinct complexion to the Constitution of the country. This book covers its application in the turbulent history of the island, which provides a singular if not a unique example of the sustenance of constitutional order in extreme circumstances; constitutionalism in full swing.

Sommario/riassunto	Medicinal and aromatic plants (MAPs), as open-field crops, play an important role in multifunctional and sustainable agriculture as a result of their low energy requirements for cultivation and their many avenues of use, from the production of nutraceuticals, phytonutrients, and phytotherapy to land valorization. This Special Issue of Agriculture, "Medicinal and Aromatic Plants in Agricultural Research when Considering Multifunctionality and Sustainability Criteria", aims to illustrate the role of MAPs in agriculture in low-impact farming practices, and the benefits they can generate in terms of functional products. This Special Issue covers all research aspects related to MAPs, including a number of scientific macro-areas, such as agronomy, chemistry and pharmacy, ethnobotany and ethnopharmacology, food and nutrition, and ecology. Key topics in this Special Issue include, but are not limited to, the following: Sustainable agricultural practices of MAPs; Breeding and germplasm preservation of MAPs; The biodiversity

of MAPs; The conservation of cultivated and wild MAPs; Ethnobotany and ethnopharmacology; Phytotherapy, phytochemistry, and phytopharmacology; Essential oils and secondary metabolites; Functional foods and MAPs; MAPs and degraded and marginal land recovery; The global marketing of MAPs; The legislation of MAPs.
