

1. Record Nr.	UNINA9910784965203321
Titolo	Biomechanical systems technology . [Volume 2] Cardiovascular systems [[electronic resource] /] / editor, Cornelius T. Leondes
Pubbl/distr/stampa	Singapore ; ; Hackensack, N.J., : World Scientific, c2007
ISBN	1-281-91175-5 9786611911751 981-277-137-9
Descrizione fisica	vii, 270 p. : ill
Altri autori (Persone)	LeondesCornelius T
Disciplina	612.76
Soggetti	Biomechanics - Methodology Cardiovascular system
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	ch. 1. A simulation study of hemodynamic benefits and optimal control of axial flow pump-based left ventricular assist device / Huiting Qiao, Jing Bai and Ping He -- ch. 2. Techniques in visualization and evaluation of the in vivo microcirculation / Shigeru Ichioka -- ch. 3. Impedance cardiography: development of the stroke volume equations and their electrodynamic and biophysical foundations / Donald Philip Bernstein and Hendrikus J. M. Lemmens -- ch. 4. Indicator dilution techniques in cardiovascular quantification / Massimo Mischi, Zaccaria Del Prete and Hendrikus H. M. Korsten -- ch. 5. Analyzing cardiac biomechanics by heart sound / Andreas Voss, R. Schroeder, A. Seeck and T. Huebner -- ch. 6. Methods in the analysis of the effects of gravity and wall properties in blood flow through vascular systems / S. J. Payne and S. Uzel -- ch. 7. Numerical and experimental techniques for the study of biomechanics in the arterial system / Thomas P. O'Brien, Michael T. Walsh, Liam Morris, Pierce A. Grace, Eamon G. Kavanagh and Tim M. McGloughlin.
Sommario/riassunto	"Because of rapid developments in computer technology and computational techniques, advances in a wide spectrum of technologies, coupled with cross-disciplinary pursuits between technology and its application to human body processes, the field of

biomechanics continues to evolve. Many areas of significant progress include dynamics of musculoskeletal systems, mechanics of hard and soft tissues, mechanics of bone remodeling, mechanics of blood and air flow, flow-prosthesis interfaces, mechanics of impact, dynamics of man-machine interaction, and more. Thus, the great breadth and significance of the field in the international scene require a well integrated set of volumes to provide a complete coverage of the exciting subject of biomechanical systems technology. World-renowned contributors tackle the latest technologies in an in-depth and readable manner."
