From Independence to Social Security; 3.Enterprising Liberalism; 4. Uncertainty, Liberalism and Contract; 5.Risky Contracts: Gambling, Speculation and Insurance; 6.Insurance, Actuarialism and Thrift; 7.Risk, Crime Control and Criminal Justice; 8.Risking Drug Use; 9.Risk, Uncertainty and Freedom; Bibliography; Index
Sommario/riassunto	Both risk and uncertainty are neo-liberal concepts, which can be viewed as complementary techniques for governing diverse aspects of life, rather than natural states of things. This new book examines the way these constructs govern the production of wealth through 'uncertain' speculation and 'calculable' investment formulae. The way in which risk and uncertainty govern the minimisation of harms through insurance and through the uncertain practices of 'reasonable foresight' is

discussed, and O Malley looks at the way these same techniques were historically forged out of moral and soci

Sommario/riassunto

Available open access digitally under CC-BY-NC-ND licence. The realities of autonomous weapons are a complex blend of both existing military technologies and visions of their future capabilities. The expected ramifications are profound and always point to the interplay between fact and fiction, actual developments and creative imagination. This book explores how these realities shape and become themselves shaped by popular culture, regulatory and ethics debates, military doctrines, policies and research. It examines phenomena ranging from film and artistic interpretations to warfare scenarios and weaponized artificial intelligence. Intended for researchers (including the disciplines of political and social sciences, media, culture and technology), policy makers, educators and journalists, this is a key resource that uncovers how autonomous weapons are constructed as both a technological reality and a futuristic possibility.
