

1. Record Nr.	UNINA9910785002403321
Titolo	Assessing tuberculosis prevalence through population-based surveys [[electronic resource]]
Pubbl/distr/stampa	Geneva, : World Health Organization, 2007
ISBN	92-9061-466-8
Descrizione fisica	1 online resource (248 p.)
Disciplina	362.196995
Soggetti	Tuberculosis Public health
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di contenuto	COVER; COPYRIGHT; Acknowledgements; Errata; Contents; Executive Summary; Annexes
Sommario/riassunto	This publication provides countries with practical guidelines for planning population-based surveys to estimate the prevalence of tuberculosis (TB) at a national level. TB prevalence surveys yield useful information in areas where notification data obtained through routine surveillance are incomplete, or of unproven accuracy, and in areas with an estimated TB prevalence of more than 100 per 100 000. These surveys are used to evaluate the performance of the TB program, and to assess trends over time. To achieve this objective, data are collected through standards methods in a well-defined study
