Sommario/riassunto	The 2009 World Malaria Reportsummarizes information received from 108 malaria endemic countries and other sources and updates the analysis presented in the 2008 report. It highlights progress made in meeting the World Health Assembly targets for malaria to be achieved by 2010 and 2015, and new goals on malaria elimination contained in the Global Malaria Action Plan. Readers of this Reportwill want to know, in comparison to last year: have finances continued to grow, to enable

scale up throughout Africa and globally? Have the commodities distributed by national governments ended up in household
