1. Record Nr. UNINA9910785014603321

Titolo	Synthetic biology [[electronic resource]] : building on nature's inspiration : interdisciplinary research team summaries : Conference, Arnold and Mabel Beckman Center, Irvine, California, November 20-22, 2009
Pubbl/distr/stampa	Washington, D.C., : National Academies Press, 2010
ISBN	1-282-64486-6 9786612644863 0-309-14943-6
Descrizione fisica	1 online resource (120 p.)
Disciplina	570.7
Soggetti	Synthetic biology Bioengineering Biotechnology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	""Front Matter""; ""The National Academies Keck Futures Initiative""; ""Preface""; ""Contents""; ""Conference Summary""; ""IDR Team Summary 1: What new foundational technologies and tools are required to make biology easier to engineer?""; ""IDR Team Summary 2: What are the significant differences, if any, between risk assessment capacity and religious analyses of the moral permissibly for synthetic biology applications and other biotechnology applications?"" ""IDR Team Summary 3: Reconstructing gene circuitry: How can synthetic biology lead us to an understanding of the principles underlying natural genetic circuits and to the discovery of new biology?""""""IDR Team Summary 4: Designing communities of cells: how do we create communication and collaboration between cells to allow for specialization and division of labor?""; ""IDR Team Summary 5: Why are human-designed biological circuits and devices fragile and inaccurate relative to their natural counterparts?"" ""IDR Team Summary 6: How can genomics be leveraged to develop coherent approaches for rapidly exploring the biochemical diversity in
