Sommario/riassunto	This report presents the results of a transparency assessment carried out in Lebanon. It gives a comprehensive assessment of the level of transparency and the level of vulnerability to corruption within the six primary functions of the pharmaceutical sector - registration, inspection, promotion, selection, procurement and distribution of medicines. The methodology provides both qualitative and quantitative information. Three national investigators, selected by the Ministry of Health, collected data by conducting a series of interviews with 50 carefully selected key informants. The inform
