Sommario/riassunto	A fundamental work on the peopling of the Americas. This volume, originally published in 1922, constitutes the most complete summary of anthropological information on Florida up until that point. Not only does it consider all previous research on Florida archaeology, physical anthropology, and aboriginal history, it also contains Hrdlicka's analysis of every human bone from Florida that he could find in collections. He made remarkably accurate observations about the general physical types of prehistoric Florida Indians and how they compared to nativ
