Nota di contenuto	Introducing the problematique of law and new governance : from phronesis to compromise -- Economy, polity, and the European experience -- The European Commission and the law making process : compromise as a category of praxis -- Procedural rationality, power, and the bureaucratic mode of thinking -- Ruptures in established practice -- Elements of a theory of law making in the European Union.
Sommario/riassunto	This book presents a theory of law making in the European Union, focusing on new governance structures which promote deliberation, proceduralization, and dialogue. The empirical substantiation of the argument is premised on case studies from the EU, such as the Information Society Directive, domain name dispute resolution by ICANN, Internet filters, and the proposal for a Directive on the patentability of computer-implemented inventions.
